Art Unit: 1755

1. This Office action is in response to the after final amendment filed 11/23/05 (entered) and refers to the final rejection mailed 9/21/05.

2. The following is an examiner's statement of reasons for allowance: as applicants point out in their latest amendment, the prior art Shepodd reference discloses combining a catalyst with a support, followed by adding a cryogenic liquid, in contrast to the present invention which combines a liquid catalyst with a cryogenic liquid followed by addition of a support. Nothing in Shepodd suggests a different order of combination and addition. In addition, the Thomas et al. US patent cited in the PTO-892 of the final rejection referred to above, while disclosing the steps of the present invention in the order claimed and using the reagents claimed, is drawn not to use of a cryogenic liquid to accomplish its combination of catalyst and support but to use of supercritical fluids, which according to the tables found in Thomas have boiling points vastly different from those of the cryogenic liquids of the present invention and also require pressures above 1 atm in order to evaporate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Pasterczyk whose telephone number is 571-272-1375. The examiner can normally be reached on M-F from 9 to 5:30.
